

I want to do a worship rehearsal!

For optimal results, make sure to have a sound technician here for the next time, but this is the way to get it going on a basic level.

1. Follow the "Turning on the audio system" guide.
 - You can skip the "coffee shop" step.
2. Find the "Assign" and "Mute groups" section on the right side of the mixer, and do the following:
 1. Press **PULPIT MUTE** if needed, to make the button glow yellow.
 2. Press **STAGE ON**, it will not be lit, just press it once.
 3. Press **Effects** if needed, to make the button glow red.

3. Press **CH 9-16** (left side of the mixer).
4. Mute / unmute vocal mics as needed.

5. Press **CH 17-24**.
6. Mute / unmute instruments you are going to use (no need to mute keyboard).

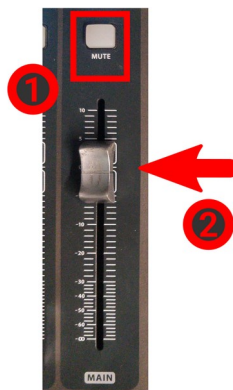

7. Set the **MAIN** fader to its lowest position.
8. Do not save this preset.
9. When finished, follow the "Turning off the audio system" guide.

I want to use the pulpit!

1. Follow the "Turning on the audio system" guide.
 - Skip the "stage" step.
 - You may skip the "coffee shop" step too, if you don't have people there.
2. Find the "ASSIGN" section on the mixer, on the right side.
 1. Press "**PULPIT MUTE**" if needed, to make it gray/unlit.
 2. Press "**STAGE OFF**" it will not light up, just press it once.

3. Make sure **MAIN** is not muted. (Mute button should not be red.)
4. Set Main fader to 0.

5. Press **CH 1-8**.
6. Ask someone to set the volume to something reasonable while you speak.

7. When finished, follow the "Turning off the audio system" guide.
