

SUNDAYS

STREAM lifecycle on sundays

- **10:01:** It will start to stream automatically with the “PRE-STREAM” scene.
 - This helps people to tune in, check audio and video settings, etc.
 - The “TOGGLE” button does not work during this.
- **10:30:** It will switch to the “PULPIT” scene, turn the camera there, etc.
- **During the service:** the camera will move based on the audio technician’s handling of the microphone mutes.
- **Close to the end of the service:** The end-of-stream scene will become active on the preview side only, this causes nothing yet.
- **AFTER THE BLESSING, on “AMEN”:**
 - **YOU** should manually make the FINISH scene live.
 - Make sure that the **FINISH** scene is in the preview on the left.
 - Press the “FINISH” button if it isn’t.
 - Press the “FN + Transition” to make the final scene active.
 - This will stop the recording and the live stream also.
