

STREAM lifecycle on Sundays

10:00

It will automatically start to stream, showing the “PRE STREAM” video. This helps people to tune in, check audio and video settings, etc.

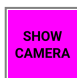

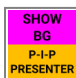

10:30

It will automatically turn the camera to the PULPIT, and the event begins.

DURING the service

Use these buttons to toggle between the camera and the selected input:

 for your pc,  for the pulpit PC,  for the audio booth PC.

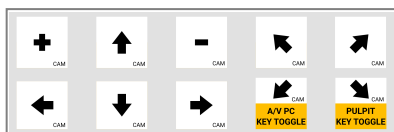

Use the  button to show the camera at any time, or the  to show the generic background image.

Changing camera angles

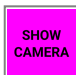

If you ever need to change the camera angle, then press any of these once, to reload camera positions:

To manually move or zoom the camera, press any of these:

AFTER the end, after the blessing, on “AMEN”

- Press **FN + FINISH** ( + )
- This will end the recording and streaming after some delay.
- After all that the generic background will be shown on screens. If the service needs continuation, then just press , and everything can continue (without recording or streaming).
