

STREAM lifecycle on Sundays

10:00

It will automatically start to stream with the “SERVICE PRE-STREAM” scene. This helps people to tune in, check audio and video settings, etc.

The “TOGGLE” button does not work during this.

10:30

It will automatically turn the camera to the PULPIT, and the event begins.

DURING the service

- Use the  button to toggle between the camera and the presentation.
- Use the  button to toggle between the camera and the pulpit PC.
- Use the  button to toggle between the camera and the pc’s screen in the audio booth.

Or: * Use the  button to show the camera at any time. * Use the  to show the general background.

Optional camera management

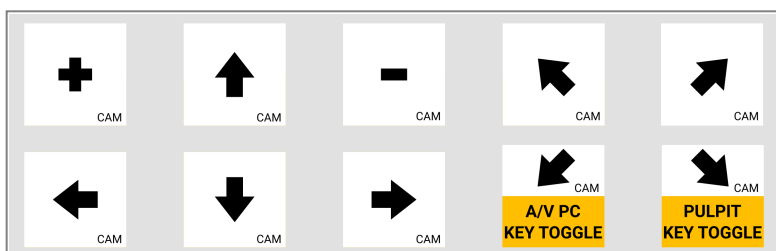

Changing camera angles

If you ever need to change the camera angle, then press any of these once, to reload camera positions:

Manual camera adjustment

To manually move or zoom the camera, press any of these:

AFTER the end, after the blessing, on “AMEN”

- Press **FN** + **FINISH** ( + )
- This will end the recording and streaming after some delay.
- After all that the generic background will be shown on screens. If the service needs continuation, then just press , and everything can continue (without recording or streaming).
