TASKS ON A SERVICE

Before the service

- Follow the "[Setting up the system]" guide.
- Just to make sure, you might want to load your last saved preset, probably the "CCP Service" one (without the MAIN!).
    - See the [rehearsal] guide on how to do that.
- Mute the stage
- Mute the pulpit and the headset

During service

Always make sure to mute/unmute the right combination of STAGE/PULPIT/HEADSET.

During worship

- Constantly monitor:
    - Did you turn off the preaching mics?
    - Is the volume in a normal range?
    - Do you hear every vocalist?
    - Do you hear every instrument?
    - Is there any distortion?
    - Is there anything that bothers your ear?
    - Doest the live stream gets the correct volume?
- **PUT YOUR HEAD OUT** to hear what is really going on.

During preaching

- Constantly monitor:
    - Is the stage turned off?
    - Only the right microphone is on? (pulpit/headset)
    - The volume is correct?
    - Is there any distortion?
    - Does the live stream gets a correct input level?

During worship, when someone speaks or prays

- Mute the effects! Having effect on praying or preaching is very cheesy.
- If it's too much to pay attention to, that's all right, then mute the effects once and forget it:)

Closing up

After the event is finished, please follow the [closing up procedure].
